

BUSINESS OBJECTIVE

Business Objective

The primary business task is to evaluate sales performance and customer purchasing behavior across all operating markets and product categories to uncover key revenue drivers and baseline efficiency. Specifically, the analysis aims to determine overall transaction volume, average spend per order, product-level demand, and regional market penetration, delivering actionable insights to optimize inventory allocation, strengthen customer retention, and increase overall revenue growth.

Analytical Areas

Sales Performance

Product Demand

Customer Behavior

Regional Performance

Sales Performance

311111

Total Revenue

What is the total revenue?

805

Orders & Transactions

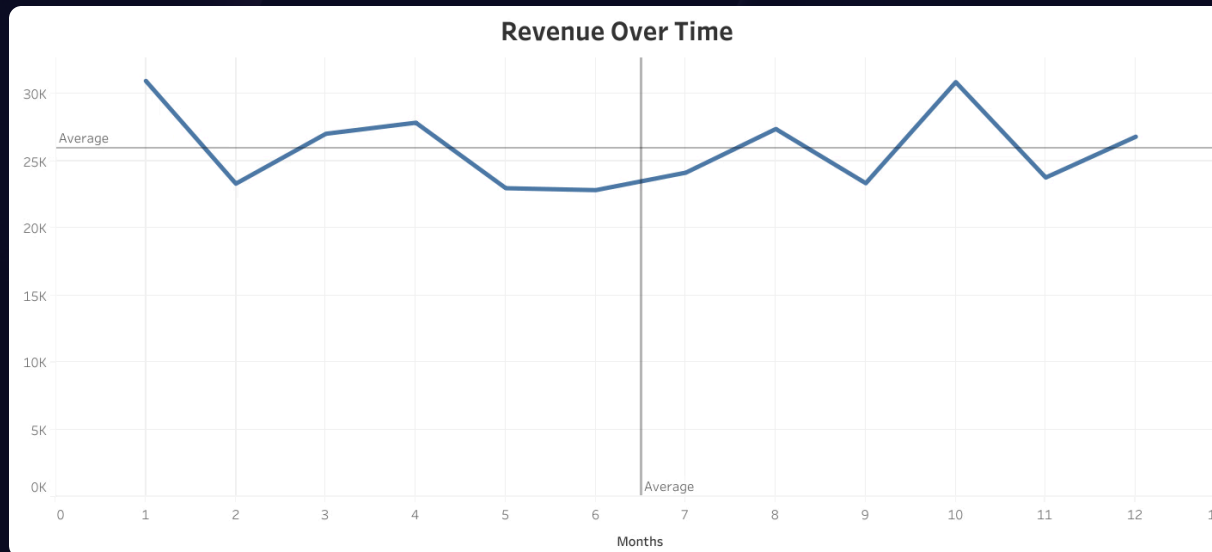

How many orders and transactions were completed?

447

Average Order Value

What is the average order value?

How does revenue change over time?

Product Demand

Which products sell the most?

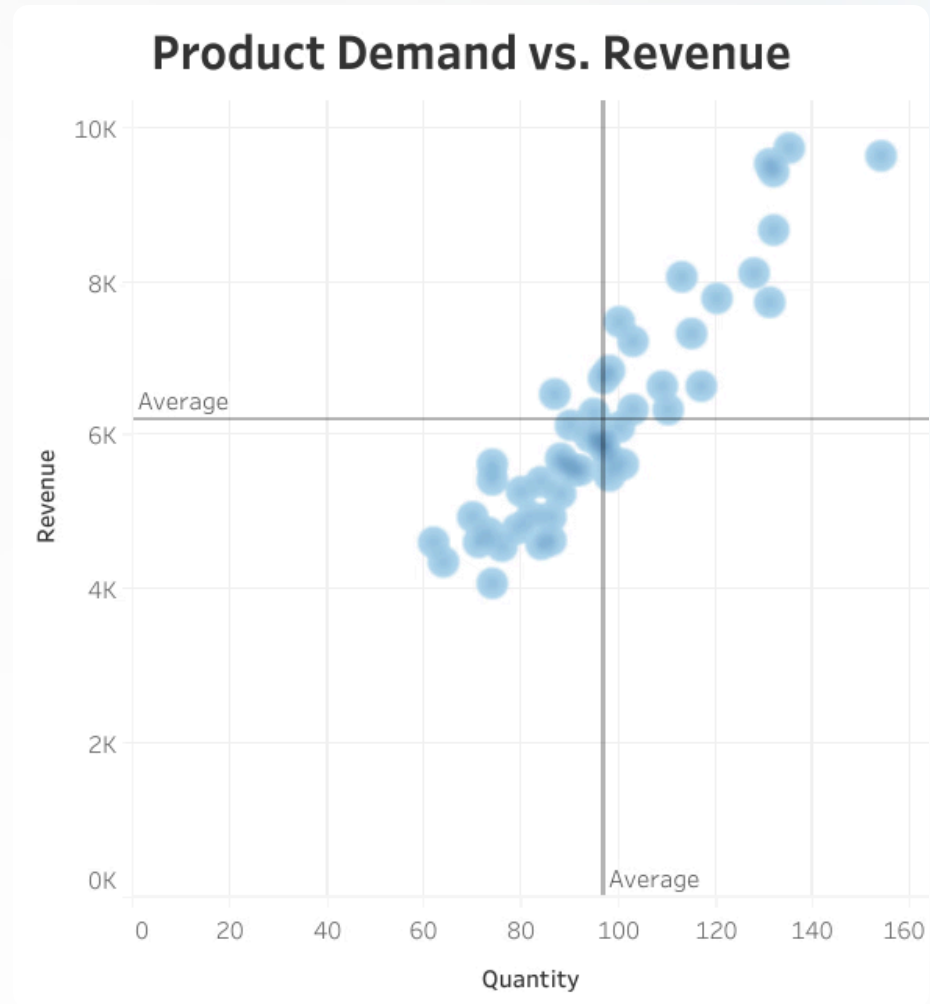

→ 62

Which products generate the most revenue?

→ Product_3

Which categories are the strongest/weakest?

→ weakest - Product_9, strongest- Product_50

Customer Behavior

267

Customers Purchasing

How many customers are purchasing?

1165

Average Customer Spend

What is the average customer spend?

Who are the highest-value customers?

#	customer_id	total_orders	total_spent	avg_order_value
1	13	5	5048	1009.60
2	39	8	4564	570.50
3	152	6	4309	718.17
4	144	7	3420	488.57
5	76	4	3330	832.50
6	113	6	2960	493.33
7	126	6	2960	493.33
8	130	4	2949	737.25
9	277	6	2939	489.83
10	231	5	2807	561.40

Regional Performance

Which region has the most user?

→ Italy

NO. of User by region
